PROFESSIONAL SUMMARY

Technical Architect and UI/UX Practice Head with 13+ years of experience in frontend engineering, architecture, and design leadership. Built and scaled teams of 20+ designers and engineers across enterprise product companies. Works at the intersection of AI and software — building GenAI-powered tools, integrating LLM workflows into design and development, and championing AI-native tooling across teams. Strong believer in design-led engineering with a consistent track record of shipping scalable, user-focused platforms on time.

AI & GENERATIVE AI CAPABILITIES

- **GenAI Tool Development:** Helped to built internal tools powered by LLMs to automate documentation, support code exploration, and generate training content - saving significant manual effort across teams.
- **AI-Native Development:** Daily use of AI tools - for code generation, refactoring, and architecture exploration. Uses GitHub Copilot alongside for pair programming.
- **AI Productivity Stack:** ChatGPT, Claude, and GitHub Copilot for development, debugging, writing technical documentation, and code reviews.
- **Design + AI:** Leverages Figma AI plugins and Figma Make to accelerate the wireframe to prototype pipeline - turning multi-day cycles into hours.
- **AI Adoption Strategy:** Drove organization wide AI adoption - tool evaluation, team onboarding, and building practical prompt engineering guidelines for both design and engineering teams.
- **Certification:** ISRO Certified in AI/ML for Geodata Analysis (2024).

TECHNICAL SKILLS

Frontend Frameworks: Angular, ReactJS, NextJS, VueJS, AngularJS, Aurelia, Durandal

Languages: JavaScript, TypeScript, C# (proficient) | Svelte (developing)

Styling: CSS, SCSS, SASS, LESS, Bootstrap

UI Libraries: AgGrid, DevExtreme (DevExpress), MaterialUI, KnockoutJS, Highcharts, Fusion Charts, FullCalendar

Backend: ASP.NET, MVC, MVC APIs, SignalR, SQL

AI & Dev Tools: Cursor, Windsurf, VS Code, GitHub Copilot, ChatGPT, Claude, Figma AI, Figma Make

Cloud & DevOps: Azure, TeamCity, Octopus Deploy, CruiseControl.NET

WORK EXPERIENCE

Technical Architect & UI/UX Practice Head

April 2025 – Present

Saksoft Ltd | Bengaluru, India

Leading UI architecture and UX practice across multiple enterprise products. Managing a cross-functional team of designers and engineers with a strong focus on AI-assisted workflows to raise delivery quality and speed.

- Architecting and overseeing 10+ enterprise web applications with a focus on scalability, performance, and long-term maintainability.
- Managing and mentoring a team of 20+ UX designers and frontend engineers — team productivity improved ~50% through structured design processes and clear feedback loops.
- Rolled out AI-assisted development across the team (Copilot, Figma Make), cutting prototype and review cycles significantly.
- Built internal GenAI tools that automate documentation, training content generation, and code exploration workflows.
- Work closely with business stakeholders to make sure architecture decisions connect to real user and business needs.

Technical Architect & UI/UX Practice Head

February 2022 – March 2025

DreamOrbit Softech Private Ltd | Bengaluru, India

Grew into the Architect role from Technical Lead - taking full ownership of frontend architecture and UX team leadership. Built the organization's design-to-development workflow from scratch and scaled the UX team.

- Architected and delivered enterprise web applications across logistics and investment management domains.
- Scaled the UX team to 20+ designers, establishing design processes that reduced iteration cycles and improved collaboration with engineering.

- One of the first in the organization to bring in AI tooling for design, development, and documentation - well before it became standard.
- Built the organization's first internal GenAI tools, helping teams move faster on repetitive tasks.
- Bridged technical decisions with business goals — worked closely with product and stakeholder teams on priorities and trade-offs.

Technical Lead & UX Team Manager

October 2021 – January 2022

DreamOrbit Softech Private Ltd | Bengaluru, India

Stepped up to own UX team management alongside existing technical responsibilities when the organization needed dual leadership coverage.

- Managed 6 UX designers through a critical project phase while maintaining full technical architecture oversight.
- Ran design reviews, established feedback processes, and kept the team aligned with engineering timelines.
- Set early standards for UX practice - processes later scaled across the full team.

Technical Lead

September 2018 – September 2021

DreamOrbit Softech Private Ltd | Bengaluru, India

Took on full technical leadership of frontend teams - driving architecture decisions, code standards, and developer mentorship across multiple concurrent projects.

- Led delivery of enterprise-scale applications in logistics and investment management, serving users across multiple geographies.
- Drove adoption of Angular and React, phasing out legacy code and measurably improving application performance.
- Introduced code review processes and engineering standards that significantly reduced production defects.
- Mentored junior and mid-level developers - several grew into senior and lead roles under direct guidance.

Senior Software Engineer

July 2016 – July 2018

DreamOrbit Softech Private Ltd | Bengaluru, India

Led frontend development across multiple concurrent projects. Key contributor on a shared UI framework that brought consistency across 6+ independently hosted applications.

- Designed and built a unified UI mechanism that delivered a consistent look and feel across 6+ separate applications — reduced user onboarding time and improved brand coherence.
- Worked directly with the core architecture team as a full-stack contributor - frontend and backend integration.
- Took ownership of frontend architecture decisions for project-level work.

Software Engineer

June 2013 – June 2016

DreamOrbit Softech Private Ltd | Bengaluru, India

Started career building SPAs using Durandal - one of the earliest single-page application frameworks — and handled full frontend-backend integration from day one.

- Built core features for CarrierRate 2.0 - a logistics booking platform covering bookings, reporting, payments, and analytics.
- Handled both frontend (Durandal, JS, CSS) and backend (MVC APIs, SQL) work throughout.
- Introduced open-source widgets that reduced development time and cut licensing costs for the project.
- Championed UI quality in a team that was primarily backend-focused - shifted how the org thought about frontend craftsmanship.

KEY PROJECTS

IMS — Investment Management System | AngularJS → Angular, DevExtreme, MVC API, SQL | 2017–2023

Role: Technical Lead & Team Manager

A long-running enterprise application for portfolio tracking, analysis, and investment workflows. I owned a multi-year migration from AngularJS to Angular while keeping the platform live and stable throughout.

- Led the full AngularJS-to-Angular migration - improved stability and future-proofed the stack with zero downtime.
- Standardized reusable UI components, cutting new feature development time by ~30%.
- Maintained high code quality standards - significantly reduced production defects across release cycles.

Trainup — Multi White-Label Learning Platform | Angular, React, MVC API | 2021–2023

Role: UI Architect

A self-paced learning platform for working professionals with fully customizable white-label branding per client — courses, feedback, and Q&A baked in.

- Designed the entire frontend architecture in Angular - built for scale across multiple white-label deployments from the ground up.
- Developed a dedicated learning module in React, integrated cleanly into the main ecosystem.
- Built a reusable component library and brand guidelines that kept each client's product distinct while running on a shared codebase.

Command Center 2.0 | Aurelia, MVC API, SQL | 2015–2017

Role: Senior Software Engineer

A logistics management web app for agents to track and manage truckloads at scale.

- Collaborated with the architecture team to unify UI/UX standards across related applications — reduced user training time.
- Delivered enhancements under tight deadlines supporting business-critical logistics operations.

CarrierRate 2.0 | Durandal, MVC API, SQL | 2013–2015

Role: Software Engineer

A customer-facing logistics booking platform with reporting, payment processing, and analytics dashboards.

- Built core booking, reporting, and payment modules from scratch.
- Integrated open-source widgets that cut development time and reduced licensing costs.

LEADERSHIP & TEAM MANAGEMENT

- Team size: Managed 20+ UX designers and 15+ UI developers across DreamOrbit and Saksoft.
- Mentored UI and full-stack developers — several grew from junior to senior and lead roles under direct guidance.
- Runs fresher training programs on modern frontend stack: Angular, React, TypeScript, Node.
- Cross-functional collaboration across product, design, and engineering - architecture reviews, production issue resolution, stakeholder alignment.

ACHIEVEMENTS & RECOGNITION

- Best Software Engineer (2015–2016) — recognized for outstanding technical contributions at DreamOrbit.
- Technical Lead of the Year (2018–2019) — awarded for exceptional leadership and on-time project delivery.

EDUCATION

B.Tech in Computer Science Engineering - Amity University (AUUP), Lucknow | 2012

Higher Secondary (XII) - Lucknow Public School (CBSE), Lucknow | 2007

CERTIFICATIONS

- ISRO - AI/ML for Geodata Analysis | 2024
- Management Development Program | 2021

LANGUAGES

English (Professional Working Proficiency) | **Hindi** (Native)
